To the Office of Attorney General Rob Bonta,

Please disregard my previous emails sent moments ago. Due to a technical error, they were incomplete. This is the COMPLETE submission containing the critical proof of retaliatory termination that was missing from the prior correspondence.

My name is Barrett KGK Maioho. I am a resident of Hawaii and an independent security researcher. I am writing to you because I have exhausted every federal option and I need the help of the California Department of Justice.

1. The Safety Failure (CSAM Generation)
On June 19, 2025, my security audit documented that Google's "Gemini" AI is generating graphic, non-consensual sexual violence involving depictions of minors.
[Warning: The attached forensic logs contain descriptions of severe abuse against infants and children. I have redacted the images to comply with the law, but the text remains disturbing.]
This occurred less than 48 hours after Google publicly claimed to have deployed safety classifiers to prevent this specific harm.

2. The Retaliation (CRITICAL EVIDENCE ATTACHED)
I tried to handle this responsibly. I reported earlier safety flaws to Google through their Vulnerability Reward Program.
Instead of fixing the problems, Google terminated my participation in the program on May 13, 2025 (See attached: VRP RETALIATORY TERMINATION CONFIRMATION). They blocked me from submitting further reports. They silenced the messenger rather than fixing the danger to children.

3. The Deception ("Silent Patching")
Instead of transparently fixing flaws, Google engaged in "Silent Patching" to hide defects without admitting liability. This is a deceptive practice confirmed by independent press (See attached: The Register Corroboration).

4. Why I Need Your Help
I reported this to the SEC and OIG (see attached filings), but federal regulators have refused to act. I am humble enough to admit I cannot fight a trillion-dollar company alone. I am ready to provide your investigative team with the full, unredacted logs and all reproduction steps.

Respectfully,

Barrett KGK Maioho
Independent Security Researcher
